AR LS[®]
LONGSPAN
SHELVING

HAND LOADED/ORDER-PICKING
STORAGE SYSTEM

Authorized Distributors:

AR LS | LONGSPAN SHELVING

The hand-loaded or order-picking storage system is the ideal solution for manually storing of small to medium-sized non-palletised products.

The range of accessories and possible configurations allow the system to be modulated and tailored to any type of goods.

It is a selective system, enabling immediate access to all stored unit loads and SKUs.

Although it is a manually loaded system, it takes the full height of the facility, the use of mechanical means (S/R cranes or order-picking trucks) or of walkways located inside the shelving system allows easy access to the highest levels.

APPLICATIONS

- Spare parts, automotive parts, paints, etc.
- Industrial and hardware supplies
- Merchandising
- Chemists warehouse
- Supermarkets, Cash & Carry
- Distribution of electrical supplies
- Etc.

MULTI-TIER

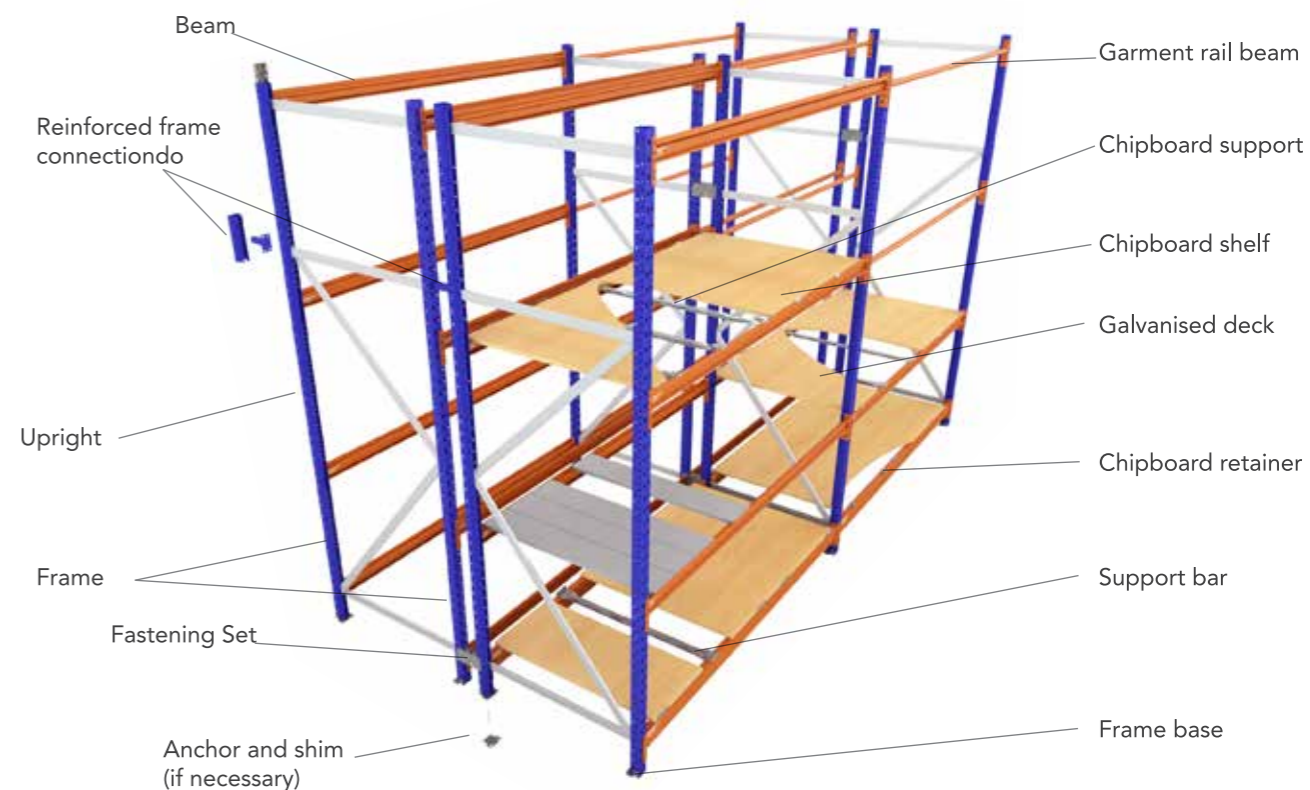

The Multi-Tier storage system is a solution in height, based on the longspan shelving system. It is ideal for manual storage where available space is limited.

This system provides excellent height maximisation of by creating different floor levels that can be by reached stairways.

CHARACTERISTICS

- Direct access to all unit loads stored and visual contact to all products.
- Easy adjustment of beam levels every 50 mm.
- Steel or chipboard shelf panels.
- Wide variety of accessories to suit any storage needs: dividers, garment hanging rails, wire mesh shelves, and more.
- Specific machines can be implemented to maximise both floor and height space, miniload and narrow aisle installations aided by order-picking.

MAIN ADVANTAGES

- **STRONG:** It is the most robust hand-loaded system in the market, enabling mezzanines and multi-tiers to be dimensioned on the shelving system itself.
- **AGILE:** Easy to assemble and to replace/add components.
- **ADAPTABLE:** Wide range of bays and shelf depths.
- **HIGH LOAD CAPACITY**
